

EARTH POT EXPERIENCE
WITH MAMI KATO
IN NUMANCERÁ

POTS WILL RISE FROM THE EARTH

MARCH 11th to 15th,
IN ARRIBES DEL DUERO (Zamora, Spain).

Earth Pot is a Mami Kato's personal style, which deeply connects with nature and the ground we stand on. From its inner space, the pot is born after modeling the emptiness that will work as a mould. Fitting the clay in this hidden shape, you will get a unique piece and see it by the first time once it's completely formed.

Workshop will start thinking about the real meaning of pot, its essence and the significance of the inner landscape it contains. What it seems to be just useless vacuum for occidental eyes, is a rich spiritual universe from the oriental culture and perspective; something we are going to learn through clay.

By digging down the ground you will feel like travelling to your childhood, to find a new creative inspiration and your most personal and artistic style, waiting to be discovered by yourself.

Besides working and giving birth to our own Earth Pot, firing and glazing with ashes, we will have time to visit interesting places around, connected with history and ceramic traditions in this beautiful and unknown area.

Accommodation and all the meals are included in the price and will be part of the ceramic experience, as extended time to share knowledge.
